

Call for Posters

The 12th Int. Conference on Networking, Architecture and Storage (NAS 2017)

(sponsored by the IEEE)

Shenzhen, China, August 7-8, 2017

<http://www.nas-conference.org/>

The International Conference on Networking, Architecture, and Storage provides a high-quality international forum to bring together researchers and practitioners from academia and industry to discuss cutting-edge research on networking, high-performance computer architecture, and parallel and distributed data storage technologies. NAS 2017 will expose participants to the most recent developments in the interdisciplinary areas.

NAS'17 will include a poster session for authors wishing to share their late-breaking research as well as work in an early stage of development that is suitable for presentation in the form of a poster. Topics of interest to NAS can be found on its website (<http://www.nas-conference.org>). We invite all potential authors to submit their contributions in the form of a two-page PDF file formatted with templates for regular IEEE conference papers ([IEEE Conference templates](#)). A submission should include poster title, author information, and a short abstract. Inclusion of preliminary evaluation results is preferred. Posters will be selected for acceptance based on their novelty, relevance, and quality of presentation. Accepted posters will be published online at the conference website and included in the conference proceedings as extended abstracts, while authors will retain the copyright for these contributions. Authors of accepted posters are expected to prepare and present their posters. Format of posters for display will be available after notification of acceptance.

To submit, please use NAS'17's submission website at EasyChair (<https://easychair.org/conferences/?conf=ieeenas2017>). No reviews will be provided.

Important Dates

Abstracts due: June 12, 2017

Author notifications: June 16, 2017

Camera-ready Abstracts: June 26, 2017

For any questions about the submission, selection, and presentation of the accepted posters, please contact NAS program chairs, Dr. Haiying Shen or Dr. Christian Engelmann (Email: hs6ms@virginia.edu or engelmann@ornl.gov).
